Dated: 13th Feb, 2013

I visited 80 slum tenements near Jama Masjid today. The condition of these flats is extremely bad. It appears that these tenements have never been repaired. Except some repairs of the staircases no repairs was visible. The electrical wires were hanging in dangerous conditions. The sanitary fittings on the exterior including drain pipes, are extremely bad and the condition of the flats at some locations, appears to be dangerous. Some industrial activities were going on in the basements.

From the inspection, it appears that, at least some portions of the flats have become dangerous. The corrective action needs to be initiated. Kindly put up a status note on these flats, their terms of allotment, and responsibility for repair and maintenance of these buildings.

A list of all the tenements allotted by DUSIB may be prepared and inspection of the same may be carried out so that corrective action can be initiated. A preliminary status note may be submitted within a week to me.
